**Preferred Citation note**

Please cite materials from the University Archives in the following manner: Item. Collection Title. Eastern Michigan University Archives.
Administrative History

The Water Tower on the Eastern Michigan University campus in Ypsilanti, Michigan, was constructed in 1889. Architect William R. Coates designed the building in order to serve as the water supply and electricity generator for the city street lamps in Ypsilanti. The Tower is 147 feet tall and can hold 250,000 gallons of water, and continues to serve as the city's water supply.

Scope and Contents

The Water Tower bookend is a metal bookend, coated in bronze paint, representing in miniature the Ypsilanti Water Tower on the Eastern Michigan University campus.

The Water Tower was constructed in 1889. Architect William R. Coates designed the building in order to serve as the water supply and electricity generator for the city street lamps in Ypsilanti. The Tower is 147 feet tall and can hold 250,000 gallons of water, and continues to serve as the city's water supply.
